

**Testing Capabilities of Novel Coronavirus 2019-nCoV Antigen Test
(Colloidal Gold)**

The sample collection time is 30s, the sample processing is 30s, and the sample detection is 15min. The total time required to perform the test (from clinical specimen collection to result) is 16 minutes. Each person can complete 90 tests within 1 hour (15min reaction time, 30s recording time for each sample, 1 hour in total). Each person can test 720 tests per day (8 hours working day) (excluding sample collection time and sample processing time).
