Dear colleagues,

On 13 October the Council adopted a [recommendation](#) to coordinate measures affecting free movement. This recommendation tasks ECDC to publish weekly maps outlining the status of the common criteria for EU regions, using the data provided by the Member States.

To allow us to develop the maps the Council Recommendation includes the following text: 9. *To ensure that comprehensive and comparable data is available, Member States should, on a weekly basis, provide the European Centre for Disease Prevention and Control with data available on the criteria mentioned in point 8'.*

With this email, I would like to bring to your attention that as of next week, we will use data of the prior week reported to TESSy by Tuesday 23:59 for the map that will be published on the [ECDC website](#) on Thursday in the same week. If the data are not available to ECDC by the deadline the respective Member State will appear 'grey' in the map as indicated in the Council Recommendation 'grey, if not sufficient information is available to assess the criteria in points (a) to (c) or if the testing rate is 300 or less COVID-19 tests for infection per 100 000 population'.

For the maps published in week 42 (this week), we have used data provided to ECDC after the deadline or collected from national websites as it was the first time we all went through this process. I would like to inform you that we will not be able to do that in the future, so please submit the requested data to TESSy by the deadline.

With my best regards,

[REDACTED]
