Dear All, Yesterday we have finished the very successful field evaluation of the antigen rapid test at Schiedam test straat. You all contributed substantially and I am very grateful for your help!! I need to highlight the outstanding job 5.1.2e lid, we couldn't have done without you! Just for your information we have included 986 patients, 16.7% positive with Ag test. The rest of the data is being generated and analyzed as we speak and will be already presented next week to the OMT (outbreak management team) and other parties as the interest is high in this data. As a small token of gratitude 5.1.2e has arranged chocolates and a bol.com gift card for all of you. I can leave on your desks or can also mail it to you if you provide your address. If you are interested in the final results please feel free to contact me in 2-3 weeks time. There will be also a publication within short time where you all will be acknowledged. Best wishes, Yours sincerely, 5.1.2e Viroscience
