Received: Tue 11/3/2020 3:21:39 PM

Ha T-team,
 Goed nieuws, we kunnen de case-based data weer rapporteren.
 Beetje vreemd miltje, niet helemaal duidelijk hoe lang dit al mogelijk was, maar in zijn eerste mail stond toch echt dat we tijdelijk moesten stoppen met rapporteren.

Hoe dan ook; graag weer dagelijks de tetsy upload doen. Hierbij dus alleen **valideren** en **niet approven!**
 Ik doe die van vandaag even, en ook gelijk het NCOVtest bestand.

Deze kunnen dus weer in de routine van T-dienst komen.

We hoeven dus voorlopig niet alles te gaan omzetten in het aggregated bestand, dat scheelt veel werk!
 Ik zou nog wel graag met iemand van het T-team overleggen over een aantal aanpassingen die nog wel gedaan moeten worden:

- Maken NCOVTEST bestand door R-team (en overleg over bron; virologische dagstaten of teststraten)
- Aanpassen case-based bestand door R-team met toevoeging van NICE data voor ziekenhuis opname en IC opname.

Wie zou dit willen oppakken?

Groeten, [redacted] 5.1.2e

Dear [redacted] 5.1.2e

I tried to call you just now, sorry for the confusion. The plan, currently, is for you to continue to report to TESSy case-based data, as well as testing information (NCOVTEST if possible, I believe you've been using the NCOVAGGR record type so far, for testing data).

For case-based files, it's enough that you validate the upload, we will pick it up from there, no need to try and approve it, it will not work.

Please keep in mind that you will need to reject last week's upload first, here:

[redacted] 5.1.2h

Please let us know if we can help, and if you think you can manage the uploads today, and again, apologies for the confusion.

Best regards,

[redacted] 5.1.2e

Subject: RE: NL COVID data reporting to [redacted] 5.1.2e
Importance: High

Dear [redacted] 5.1.2e,

Unless I missed this, we haven't received a message on the technical problem with the case-based data, is that

correct?

Do you have any idea how long this will still take? If you expect this to take much more time, we can consider switching to the reporting of aggregated data by NCOVAGGR instead, but this will take quite some time for us to adjust our script to this reporting dataset.

Could you maybe tell me on the expected future of this case-based reporting; will the case-based reporting stop soon anyway, so it will be worthwhile to switch to the aggregated data, or will these two systems keep on existing in parallel?

Currently, we only report the sentinel covid data (by NCOVclassification on tuesday and for this first week via the influenza dataset on wednesday). We are working on the NCOVTEST, but because of the problems with the case-based reporting, only very little Dutch data is reported to ECDC.

Hope to hear from you and be updated on this issue.

Thanks a lot, 5.1.2e

Subject: NL COVID data reporting to 5.1.2e

Dear 5.1.2e

Thank you very much for the conversation just now.

To confirm, we are asking you to:

1. Please continue to report aggregated COVID data (NCOVAGGR, NCOVCLASSIFICATION, NCOVTEST, etc.);
2. Temporarily stop reporting case-based NCOV data, while we come up with a better solution, since right now it is not working, and slowing down the reporting of aggregated data;

Thank you very much for your help, we will come back with a solution as fast as possible.

Best regards,

5.1.2e
