Coronavirus COVID-19

Public Health Advice

If you have fever and/or cough you should stay at home regardless of your travel or contact history.

If you have returned from an area that is subject to travel restrictions due to COVID-19 you should restrict your movement for 14 days. Check the list of affected areas on www.dfa.ie

How to Prevent

- Wash:** your hands well and often to avoid contamination
- Cover:** your mouth and nose with a tissue or sleeve when coughing or sneezing and discard uselessly
- Avoid:** touching eyes, nose, or mouth with unwashed hands
- Clean:** and disinfect frequently touched objects and surfaces
- Stop:** shaking hands or hugging when saying hello or greeting other people
- Distance:** yourself at least 2 metres (6 feet) away from other people, especially those who might be unwell

All people are advised to:

- > **Reduce** social interactions
- > **Keep a distance** of 2m between you and other people
- > **Do not** shake hands or make close contact where possible

If you have symptoms visit hse.ie QR phone HSE Live 1850 24 1850

Symptoms

> Fever (High Temperature) > A Cough > Shortness of Breath > Breathing Difficulties

Subject: SV: Urgent request for information - COVID-19 restrictions

Dear all

We are working on a transparent assessment system with the following indicators:

Main

- Incidence (cases per week per 100,000 population)

Additional

- Percent positive
- R, calculated with adjustment for test activity. R is calculated for cases and for admitted patients (the latter without adjustment for test activity)
- No admitted to hospital
- Proportion of municipalities with an incidence > 20 pr 100,000

Qualifying indicators

- Outbreaks, numbers and settings
- No of cases detected without known contacts
- No of cases detected within households
- Transmission from mink or other animals

This system will not be linked one-to-one to a risk management strategy, but will inform the use of the "toolbox".

The current restrictions are summarized in the attachment, unfortunately in Danish but google translate may assist you..

Kind regards

5.1.2e

Subject: RE: Urgent request for information - COVID-19 restrictions

Dear 5.1.2e

You can find at this URL a short summary of the measures that are actually implemented in France : <https://solidarites-sante.gouv.fr/soins-et-maladies/maladies/maladies-infectieuses/coronavirus/etat-des-lieux-et-actualites/article/indicateurs-de-l-activite-epidemique> (in English through Google Translation [here](#))

Please note that these measures are implemented by territories (regions or departments), based on the epidemiological assessment of the situation. You can find daily updates on our surveillance data [here](#) or [here](#) ; the latest link is our Geodes atlas, which allow you to display dynamically different indicators and areas.

Although we were already asked by our government to assess the impact of these measures regularly, this is a very difficult question to be answered as a) there is not a single measure but a set of different ones, which can be implemented at different times ; b) COVID-19 incidence data needs to be consolidated in order to start such an assessment.

We are currently assessing the best way to perform this assessment, using not only incidence data but also cluster reports in order to ascertain if the frequency and size of those clusters, by type of clusters, evolve in the right way. Work in progress ...

Best regards,

Objet : Urgent request for information - COVID-19 restrictions

Dear all

Our National Public Health Emergency Team met yesterday and we recommended that Ireland move to highest level of restrictions in our living with COVID national plan - level 5, <https://www.gov.ie/en/campaigns/resilience-recovery-2020-2021-plan-for-living-with-covid-19/>

As infection rates are now rising in most countries I have been asked to establish what further restrictions you may be considering, if any, and what your government policy will be? As implementation of our level 5 restrictions will have wider societal and economic impacts we have to take those into consideration.

In addition, if there are any measures you have put in place that have resulted in a sustained decrease in infections it would be great if you could share them!

Many thanks
