Dear 5.1.2e [redacted]

Europe is confronted with a strong 2nd corona wave.

We are pleased in The Netherlands with the deal we made in September and per November 1st we will be on at least 350.000 tests per month.

The question we have (and please please help): can we (substantially) further increase that monthly volume?
What would be an amount that you could potentially do and help us with?

Please I appreciate your response and help.

Warmest
