Subject: URGENT (before 5pm today) - COVID-19 test procedures/test strategies
Received: Tue 11/3/2020 1:20:54 PM

Dear Epipose members,

Please reply before 5pm today

The European Commission wants to streamline COVID-19 test procedures and test strategies in Europe and wants to know what research or activities are currently being conducted on this topic. These insights would help to define a test policy to be used during an exit phase with regards to the current lockdown conditions in many countries.

[redacted] 5.1.2e (Antwerp University and PI of the Recover project) is preparing a 2-page note on this topic for [redacted] 5.1.2e and for the president of the European Commission, Ursula Von der Leyen.

It would be great if we as Epipose team could contribute to this note and next steps.

Please let us know if you are involved in relevant projects on test strategies and test procedures.

Thanks everyone for a quick response!
