Dear all, on request of 5.1.2e [redacted] I looked at your letter with a 'legal' eye. It is good that you only point at some ambiguity in their sharing agreement and off to discuss this. At the same time you offer a chique alternative for what might be called an over-the-top reaction.
 So for this instance I have only made a few semantic suggestions and think the text is very oke. That being said I have 1 more principle question: why is only RIVM mentioned and not also AMC?
 If there is no objection of which I am not aware: I would suggest to mention AMC in the first paragraph besides RIVM. The text about contributing at GISAID need not be altered, at least not for RIVM.
 And I would like then to suggest to sign with the 4 names + institutes (behind the name of 5.1.2e [redacted] : corresponding author). That gives a stronger feeling.

Let me know when I can do more
