Follow-up:

- Vandaag (maar was al vorige week ingepland) overleg gehad met Hologic, werkafspraken gemaakt mbt multiplex (multiplex komt alleen in plaats van, niet 'on top of' helaas, voor ziekenhuizen alleen deels interessant, wordt ingeregeld zonder financieel risico voor VWS)
- Poolinglab is e rmaar 1 die van Hologic gebruik gaat maken, die had al contact met ze gezocht, vorige week besproken met Hologic.

Subject: FW: Follow up

Hologic has NO more volume now
 If so, NL got preference
 Contact: [redacted] and [redacted]

Second: they can do pooling (5 samples) per January and want to work that out with NL now to start in January
 On the Hologic Panthers; only when prevalence is below 5-10%
 Wie kunnen ze [redacted] dit beste uitwerken?

Ze werken ook aan Flu/Corona combi test: multiplex: willen we dat?
 Met wie kunnen ze dit beste bespreken?

Last: graag praten ze (zie onder) met [redacted] verder over Breast Cancer screening

Vraag: is er nog NL questions over Hologic of all ok?

Laat me even weten hoe verder en hoe reageren?

Good evening 5.1.2e

Thank you again for your time today to speak with 5.1.2e and I.

As a summary of that discussion –

- At this point in time, we do not have any additional volume of SARS-CoV2 Assay available.
 - As and when we do secure additional volume, I will be in touch with you directly.
- Hologic has been working on an expanded solution for our Panther customers – incorporating Pooling and supply of a new composite Multiplex assay for testing and differentiation between SARS-CoV2, Influenza A and Influenza B. Our current timeline for introduction of our Multiplex is third week in December 2020 and our Pooling solution is mid Jan 2021. At this early stage, we are interested in speaking with governments that are looking at a centralised approach to Pooling – the approach that The Netherlands took to the roll out of SARS-CoV2 testing is optimal. 5.1.2e and our product team in The Netherlands are available to further discussions in relation to our solutions for Pooling and Multiplex.
 - We will wait to hear further from you in this regard.
- Separately, we are focused on supporting the National Breast Screening program in The Netherlands as they look to address the current backlog in women awaiting Mammography. Hologic has a very strong presence within this healthcare arena in The Netherlands and we believe our AI solution can assist here. We are in the process of setting up a meeting with 5.1.2e 5.1.2e (5.1.2e of Public Health) to further this discussion. This will be our first conversation with 5.1.2e 5.1.2e While at the early stages of preparation, I wanted to inform you of our work in this equally important area of Women's Health in The Netherlands – in the hope that at the right time, you may be able to assist with a recommendation to 5.1.2e following on from our work with you over recent months.
 - If you are agreeable to this request, we will confirm once we are in a position for you to reach out to 5.1.2e 5.1.2e Our thanks to you in advance.

I wish you a pleasant evening,

Kind regards
