Paperwork accompanying the shipments

Temperature Monitoring Process

Temperature monitors being pre-conditioned and configured by sending site. On the day of despatch monitors are launched and applied to the pallets monitor is started and its recording

Temperature Monitoring Process (cont'd)

Weblogger II temperature monitoring device – full instruction on how to stop and download will be provided

We do require user name, surname and country to initiate login set up for shipments during Feb – Mar. After March 2021 users will be able to set their own user name during 1st access to the system

Step 1 – Locate device and stop

1. Locate and stop the device	
1.1	Locate device in shipment
1.2	Press and hold STOP button for 3 sec. The red LED will hold a steady flash for 4 seconds indicating device is now stopped (Figure 1)
1.3	Once the logger is stopped and the start button is pressed, fixed red light will be displayed and the yellow light will flash, indicating that the logger needs to be uploaded (Figure 2)
1.4	Remove cap on device to expose USB port (Figure 3)
1.5	Plug device into computer USB port (Figure 4). CCIS Software should launch automatically
