Hoi [redacted]

Ik heb in de PHE en NERVTAG rapportages gekeken maar kan het niet vinden. Als jij het nog terug kan vinden, zou ik graag weten waar dit beschreven staat!

Bedankt,

Hoi,

Ik heb alleen gezien dat voor de UK variant de uitscheiding langer is met dezelfde loads als van de oude varianten. Dus langere acute fase. Dit kwam langs in WHO variantenoverleg afgelopen donderdag. Volgens mij laatste PHE rapportage?

Hi collega's,

Ik dacht te hebben gelezen dat ECDC geen reden ziet om beleid te veranderen vanwege de variant. Uiteraard hebben verschillende landen variaties op het isolatie en quarantainebeleid. Ook UK ziet hier geen reden toe. Ik zou hier niets mee doen, behalve wat jij voorstelt als vinger aan de pols houden.

Groet, [redacted]

Hoi [redacted]

Voor agenda RT: er zijn verschillende landen die de quarantaine/isolatieperiode verlengen ivm meer besmettelijke varianten. Ik ken zelf geen data die laten zien dat de besmettelijke periode ook langer zou zijn. Een mogelijke manier om dit op te volgen in NL is om te bezien of het aandeel positieve contacten na een negatieve test op dag 5 toeneemt, maar misschien zijn er nog andere ideeën. Persoonlijk zie ik geen redenen om de quarantaine en isolatieperiode nu al te wijzigen, maar toch wel goed om te bespreken in het RT.

Groeten,

Předmět: Rép. : FOR AF REVIEW: ECDC Guidance for COVID-19 quarantine and testing for travellers

Dear AF members and ECDC colleagues,

Any discussion/planification on guidelines on length of isolation for COVID positive patients in the era of VOC? (we are discussing in Luxembourg about increasing the isolation period from 10 to 14 days)

Any reflexions on that?

Thank you
