Subject: RE: Kind reminder: Was this product assessed by you? - Notified Body no. 2834 printed on graphene containing face masks

Hi 5.1.2e

Both Module B certificates were re-issued on 18th June 2020 due to corrections made to 'Product Description' on Annex page. The statement of 'headharness' was incorrect, and this was replaced by 'with adjustment ear loops' in CE-PC-200324-094-01-9C and CE-PC-200227-018-01-9C.

We reviewed the Technical File and noted that the product did not contain any graphene but did contain a small amount of active carbon which can to a very small extent absorb some odours. This is not a respirable issue and has been used in masks for many years and is contained in gas filtering cartridges.

We believe that the use of Graphene was a marketing exercise and was not intended to suggest that the product actually contained Graphene. We will ask the manufacturer to make this clearer on their packaging to avoid this concern.

I hope the above answers your questions. Should you have further questions please do not hesitate to get in touch.

Kind regards,

5.1.2e

Dear 5.1.2e

Thank you for your swift reply, much appreciated!

Would it be possible for you to also share:

1. the reason why the certificates have been re-issued
2. when the certificates have been re-issued
3. what the notified body's opinion on the use of graphene was (note: we consider this a potential inhalation hazard)

With kind regards,

5.1.2e

Hi 5.1.2e

Sorry for the late reply.

We can confirm both Module B certificates and the Module C2 certificate are genuine and issued by CCQS.

However, the two module B certificates have been re-issued. Thus they are no longer valid. They were superseded by CE-PC-200324-094-01-9C and CE-PC-200227-018-01-9C. Copies of the up-to-date certificates can be requested from the manufacturer directly.

The Module C2 certificate is current and valid.

Kind regards,

5.1.2e

Dear Sir/Madam,

Would it be possible for you to check whether the attached CCQS certificate is legitimate?

When the certificate number CE-PC-200324-094-01-9B is entered into the website

<http://www.ccqsuk.com/searchresult.jsp>, there are no results.

Subject: Was this product assessed by you? - Notified Body no. 2834 printed on graphene containing face masks

Dear Sir/Madam,

My name is [REDACTED], I am part of the Dutch Institute of Health and the Environment (RIVM). We assess the quality of personal protective equipment that the Dutch government buys in China. We do this by both a physical assessment as well as a check on documentation/certificates.

We have concerns about the potential health risks of the FFP2 masks below (see pictures). According to the manufacturer they contain graphene. To us, this implies an unknown health risk. Your Notified Body number is printed on the product, however, the trader/manufacturer was not able to provide us with a CE certificate.

Our question is: **did you assess the dossier of this product?** Did the product comply to the EN149 standard? Would you be able to provide us with a copy of the dossier? What were your thoughts on using graphene and its potential health risks?

Many thanks in advance,
With kind regards,
