Hi [REDACTED] does this mean you can participate in our evaluation paper? I am asking because I will send a mail to the participating labs to make sure we get data by the weekend (or Monday morning latest). I want to send it to Eurosurveillance and I believe we need to have a paper out, [REDACTED] [REDACTED]

Hi,,

no no, it was not [REDACTED] to the scientific paper. [REDACTED] probably doesn't like our involvement but that is [REDACTED] problem [REDACTED].

This was about [REDACTED] biting my head of because I said in our national response team that diagnostics were rolled out by Charite with support of EVAg. [REDACTED] felt the need to state that [REDACTED] was involved in the roll out *and I should mention that) and that due to work in EMC the protocols will probably be adapted.

Just wanted to let you know where [REDACTED] stands with respect to your work and her contribution to it. [REDACTED] claims the pie. I thought that would be good for you to know also internationally.

cheers [REDACTED]

[REDACTED] This is a scientific study and it is not up to [REDACTED] to decide who can participate. I don't understand why [REDACTED] dropping your name in a mail message can [REDACTED] you. [REDACTED]
