Subject: Re: 5.1.2e

beste 5.1.2e

Mooi stuk geworden. Zie bijlage voor nog enkele suggesties. Ben verder gegaan in de versie van 5.1.2e

Succes met indienen!

Groet, 5.1.2e

Dear co-authors

Please find attached the semi-final version of the manuscript "COVID-19 in healthcare workers in three hospitals in the south of the Netherlands".

I hope you can all have a look and provide your comments and suggestions **21st of April at the latest**.

In the next 2 days I will work on finishing and adapting the manuscript to comply to NEJM author guidelines. Figure 2 will be the completed and annotated BEAST analysis, but unfortunately the analysis needed a bit more time, so the included figure is not the final version, but we do not expect the new version to have any effect on the results.

Many thanks for all of your help so far, I hope to hear from you

Kind regards

5.1.2e

The zip file contains the interactive MST: you can download, unzip and open in your browser
