As discussed in this afternoon's Dwarsverband, I send you our advice to OMT of early March 2021.

OMT has asked for an advice on the following subjects:

vaccination of 12 to 16 year olds.booster: when, which groups and which vaccine.

- one dose vaccination after Covid

The attached advice is quite complete; extension with a summary of the latest studies seems sufficient. 5.1.2e will ask 5.1.2e to make the summary. Kind request to all the Dwarsverband-members to look in to this.

Thanks & regards, 5.1.2e
