

Hi 5.1.2e

Great if you join!

Briefly, here is where we are. Partners listed below.

- 1) ARI-primary care/SARI-hospitals networks: surveillance, vaccine effectiveness, risk factors (WP leader EPiconcept) The idea is to reinforce what we are doing in I-MOVE-COVID focusing on VOC.
- 2) HCW cohorts: surveillance, risk factors, VE (No WP Leader identified yet)
- 3) SPecial studies, transmissibility: Outbreak investigation (closed settings, LTCFs, schools, household studies
- 4) Long COVID (led by ISARIC) ISARIC will soon send a description of what they propose.
- 5) studies outside Europe (led by Instituts Pasteur international network)

Could you let me know ASAP which WPs you would like to participate and with which "infrastructure"? (e.g. number of hospitals; number of GPs). And of course... if you want to lead a WP, you are more than welcome!

If easier, we can discuss.

iGracias!

Dear 5.1.2e

Apologies for the late response. If you are still planning to submit a proposal we would be willing to participate but at this moment we don't have much time to contribute. As RIVM we will probably also join one or two other proposals.

Best wishes,

5.1.2e
