TO-WHOM-IT-MAY-CONCERN

Please be so kind as to share this information with the appropriate persons within your organization. PLEASE NOTE that a similar message has been also conveyed to << [REDACTED] 5.1.2e [REDACTED]@nfu.nl>>

**Our message is a pragmatic one: we offer production capacity for sterile drug products (in vials or syringes) for either a Corona treatment or a Corona vaccine.**

Apologizes for breaking in to your busy agenda as you most likely receive a lot of communications in these chaotic days. Our message is sincere and honest as we are ready to also contribute in the battle against the corona virus. As the global pharma industry most likely can't cope with the foreseen high demand for sterile production capacity our offer is a pragmatic one: we offer **production capacity** for sterile drug products (in vials or syringes) for either a Corona treatment or a Corona vaccine.

When needed BioConnection B.V. (Oss, The Netherlands) can support the community in the battle against the COVID-19 pandemic. We are an experienced contract manufacturer (CMO) for the GMP production of sterile drug products in vials and syringes. Our state-of-the-art GMP manufacturing facility is EMA and US-FDA certified.

**Substantial production capacity available soon.** As of April next year we anticipate to have a [REDACTED] 5.1.1c production line up & running with a [REDACTED] 5.1.1c. The order books for this new line are open. A significant part of this production capacity can be made dedicated for COVID-19 alleviation programs on "fair" commercial terms and conditions to be agreed upon in advance. In the event that COVID-19 support is required we will pause our perusal acquisition efforts for this new production line in order to not block efforts for COVID-19 programs. In addition we can offer a syringe production [REDACTED] 5.1.1c [REDACTED] 5.1.1c under the same "fair" commercial conditions.

**People make the difference.** The team of BioConnection has a << *no nonsense* >> mindset with a << *can do* >> mentality. These assets will make the difference. The team of BioConnection has no hesitations to dedicate their efforts against the COVID-19 pandemic. Our contribution on a world-wide production scale is modest it can though have an impact on the Quality of Life of several million humans.

**From research batches up to production of** [REDACTED] 5.1.1c. Besides the above mentioned new automated production line [REDACTED] 5.1.1c we have the following production lines available which may be helpful for research and/or clinical trial batches before scaling up the production to [REDACTED] 5.1.1c. Also here we will provide priority in our acquisition efforts for COVID-19 research programs:

[REDACTED] 5.1.1c  
[REDACTED] 5.1.1c  
[REDACTED] 5.1.1c

For additional information on the capabilities of BioConnection and how to best contact us see the attached fact sheet and/ or visit our website ([www.bioconnection.eu](http://www.bioconnection.eu))

Trusting to have informed you sufficiently and looking forward to your reply.

Met vriendelijke groet / Kind regards
