Hi all,

In preparation of the meeting Thursday, I attached some key research questions and assays that could help answering them.

I'd like to discuss feasibility of the proposed assays (innate stimulation, and NGS) with the amount of cells we have and the timeline we may expect results.

In addition we should discuss all details for setting up the assays (which conditions exactly, what need to be sorted out first). I attached some results of innate PBMC stimulations [5.1.2e] did before within SPR Complexa, to observe difference between young and old. We started with a broad panel of proinflammatory cytokines and chemokines, but in the end we made a selection of cytokines/chemokines measured in the LegendPlex (IL1b/CCL2/IL10/TNF/IL8/CCL3/IFNa/CXCL5/IL6/CXCL1/IFNg/CXCL10). Hope you can have a look at it, and the different panels available (<https://www.biolegend.com/en-us/legendplex>), so we can make a selection of best readout.

@ [5.1.2e] it would be great if [5.1.2e] could participate in this meeting and FFX experiments as well. Could you ask him?

Many thanks,
 [5.1.2e]

-----Original Appointment-----

To: [5.1.2e]; [5.1.2e]; [5.1.2e]; [5.1.2e]
Subject: FFX innate assays
When: donderdag 7 mei 2020 11:00-12:00 (UTC+01:00) Amsterdam, Berlin, Bern, Rome, Stockholm, Vienna.
Where:

***update: uurtje later, van 11-12u.**

 Om concrete afspraken te maken voor het opzetten van de innate assays voor de FFX samples, [5.1.2e] heeft veel voorwerk gedaan, zit er daarom bij. Club mogelijk nog uitbreiden.

Groet
 [5.1.2e]

FFX innate assays
 Thu, May 7, 2020 10:00 AM - 11:00 AM (CEST)
