[MGN Camtech-Brochure FVS.pdf](#)

Dear Team

Working in Partnership with Camtech, a well established medical company out of Singapore, with offices in Europe we have the ability to provide the Global markets with FDA certified Covid-19 rapid test kits.

With the current global shortage of rapid test kits, we are attempting to secure a supply for various countries which is becoming increasingly challenging due to the demand as the test kits have the ability to deliver results in 15 minutes including Antibody results.

Kits are being offered to health and medical professionals for clinical use in hospitals, fever clinics, pathology and medical centres.

Attached you will find a sales brochure with content detailing product information, costs, lead times and minimum order volumes for review and discussion.

We are in a position to supply referral letters from organisations already successfully using the test kits. This for you to determine if they would meet your current urgent need for rapid testing to respond to the Covid - 19 pandemic.

Should you have an interest in the test Kit please advise and we can arrange for an on line call time to provide you with more information

Thank you for your organisations efforts over this trying period, where we hope to lend a helping hand.

Kind Regards
