Subject: R: country expert interview for the EUVIS project

Dear [redacted]
On behalf of [redacted] thank you very much for agreeing to participate as country expert in the EUVIS project

Your interview is scheduled for Wednesday 30th July at 13.30 CET (calendar invite sent in separate email)
Link: [redacted]

In attachment you can find the survey tool, anticipating the questions we will ask you during the interview.
It is not needed to fill in the questionnaire. We will do it together during the interview.
Do not hesitate to contact me should you require any additional information

Thank you in advance for your collaboration,
Best wishes,

[redacted] on behalf of the EUVIS team

Oggetto: RE: [Spam] country expert interview for the EUVIS project

Please check with my secretariat (name in cc); I am on holidays and thus unavailable between Juli 31 and august 25.

There might be some room in my agenda tomorrow and otherwise beginning of September. Sorry for that, but incredibly busy with covid and need some timeout.

Best regards, [redacted] 5.1.2e

Subject: [Spam] country expert interview for the EUVIS project

Dear [redacted] 5.1.2e

I hope you are doing well.

I am writing to kindly ask to have you as immunization expert for The Netherlands involved in a study we are conducting on digitalization of immunization programs in Europe

As members of the EUVIS (EUrope Vaccines ICT Strategies) project we are conducting semi-structured interviews to country experts aiming to collect best practices on the use and impact of Information and

Communication Technologies (ICT) and digital tools to increase vaccine uptake and ultimately vaccination coverage in selected European countries.

Would you have time for a short (max 30 minutes) interview with me and the team ?

I really hope you do dear 5.1.2e

Below you will find a brief description of the EUVIS project but not hesitate to contact me should you require any additional information

Thank you in advance

Best wishes,

5.1.2e

The EUVIS (EUrope Vaccines ICT Strategies) project, coordinated by the School of Public Health of the University Vita-Salute San Raffaele in Milan (Italy), aims at collecting best practices on the use and impact of Information and Communication Technologies (ICT) and digital tools to increase vaccine uptake and ultimately vaccination coverage in Europe.

The field of ICT has flourished in recent years revolutionizing the processes of gathering, spreading and utilizing health information among healthcare providers, citizens and mass media. In particular, we are interested in digital technologies that can improve vaccine uptake supporting actions aimed at both increasing the demand of vaccines (i.e. provide access to information through telecommunications, networks, the Internet, wireless, mobile devices) and the supply of effective and efficient life-course immunization services (i.e. ICT-based interventions to support immunization programmes delivery and their monitoring).

Within EUVIS we have conducted systematic reviews to pool available evidence from experimental studies on the impact of ICT-based intervention to improve vaccine uptake and other associated outcomes (1, 2). Here we kindly ask your collaboration to gather useful data on the use and impact of ICT and digital tools within immunization programmes in your country at the national, regional, or local level, as well as to get your expert insight on the potential and challenges in this area.

We anticipate it won't take more than 20 minutes to fill in the questionnaire.

We would like to thank you in advance for your collaboration
