Onderwerp: CovID Initiative

Dear [REDACTED]

We currently see many data driven solutions being developed by governments and initiatives around the world which lack a Privacy first approach and which are not GDPR compliant in the fight against Covid-19.

In many countries, we are witnessing infringements on personal liberties and privacy. While an emergency such as this warrants a strong response, it should not be at odds with the privacy of individual citizens.

Together with partners, the IOTA Foundation (non-profit) is launching an initiative which protects people's privacy whilst at the same increases data availability to support better and faster decision making. We seek to raise (cost covering + contingency) between [REDACTED] and [REDACTED] Euros for rapid development of the proposed consumer-facing app and framework and would like to secure your support.

Would it be of interest to collaborate on this initiative together?

Kind regards,

[REDACTED]

IOTA Foundation
