

Explanation

The monitor consists of five work packages that integral form the base of the 'Gezondheidsmonitor-GOR-COVID19'. All work packages are strongly connected and continuously exchange knowledge and data (indicated by the blue double arrow). The scientific character of the monitor is secured by an ongoing iterative process of posing hypothesis, testing these hypotheses and research questions by integrating existing data (WP2) with newly assembled and registry data (WP3a,b,c WP4a,b) and then A) integrate these insights in the next rounds of data assembly (colored arrows: input for internal dialogues 'Network GOR'; black arrows: output for WP5, WP4a,b, WP3a,b,c and WP2); and B) translate these insights to practice and policy (input WP5; black arrows; output WP5 light blue arrows) with internal and external professionals, policymakers and experts. This process is an ongoing (at least) yearly cycle (plan-do-check-act) but will be adjusted accordingly.

Legend

WP1: Lead RIVM. **Coordination of the Integrated Public Health Monitor-COVID-19/ Gezondheidsmonitor GOR-COVID-19.** WP1 will coordinate this program and will organize at least yearly 'internal dialogues' for knowledge integration and controlling the scientific iterative process.

WP2: Lead RIVM/Nivel. **Literature Review.** Every year the literature review will be updated with relevant literature for all indicated target groups.

WP3a: Lead GGD-GHOR Nederland: **Long Cycle Health Monitors;** an x marks the publication of the monitor (see PVA; blue X – youth, red X – (young) adults, green x – adults/elderly).

WP3b: Lead Nivel: **Long Cycle GP Registry Data (Lang Cyclische NZR);** an x marks the publication of the monitor (see PVA; blue X – youth, red X – (young) adults, green x – adults/elderly).

WP3c: Lead GGD-GHOR Nederland: **public mental healthcare target group (OGGZ) monitor.**

WP4a: Lead RIVM: **Short Cycle Panels.** For youth and adults, data will be assembled every three months and will be shortly there after available online.

WP4b: Lead Nivel: **Short Cycle General Practitioners (GP) Registry Data (Kort Cyclische NZR).** For youth and adults, data will be assembled every three months and will be there after available online.

WP5: Lead ARQ Nationaal Psychotrauma Centrum: **Dialogue sessions with stakeholders: Balancing Science, Practice and Policy;** WP2, WP3a,b,c, WP4a,b and the 'internal dialogues Network GOR' (WP1) serve as input for yearly WP5 dialogue sessions with internal and external professionals, policymakers and experts. The data will be integrated and interpreted for the purpose of health policy making at the national, regional and local level. The output of the dialogue sessions (knowledge, data and insights) will be disseminated among national and local/regional policy makers and professionals (such as: GGD's, VNG, JOGG). Per target audience one or two dialogue sessions will be held each year.
