Subject: Kind Reminder - EU Commission request for information on post-COVID surveillance
Received: Thur 4/21/2022 2:57:39 PM

To: NFP for Surveillance (members/alternates), NFP for Microbiology (members/alternates)
cc: National Coordinators (members/alternates), EU Commission

Dear National Focal Points for Surveillance and Microbiology,

This is a kind reminder about the request from DG SANTE for information and/or any publications on digital integrated surveillance of epidemic/pandemic-prone infectious diseases in your country – please see below.

Thank you for your cooperation.

Kind regards,

5.1.2e

Subject: EU Commission request for information on post-COVID surveillance

To: NFP for Surveillance (members/alternates), NFP for Microbiology (members/alternates)
 cc: National Coordinators (members/alternates), EU Commission

Dear National Focal Points for Surveillance and Microbiology,

Please find below a request from DG SANTE for any unpublished or hard-to-find information regarding any existing or planned new digital integrated surveillance of epidemic/pandemic-prone infectious diseases in your country. The work has been outsourced to a consortium led by NIVEL and RIVM and is also supported by ECDC. Thank you for your cooperation.

Kind regards,

5.1.2e

5.1.2e

Dear Mr / Mrs,

I hope this e-mail finds you doing well.

As you may have heard by now, the work coming from the RfS on the 'Lessons Learnt from COVID 19 surveillance and other

epidemics' (in short: Postcovid Surveillance) has been contracted to the EUHealthSupport consortium, consisting of NIVEL, RCSI and RIVM among others. A scoping review of the relevant literature has been our starting point. To that end, we have drafted a search protocol to retrieve relevant literature from scientific journals and grey literature databases.

Publication bias

Still, these sources of information may not yield full coverage of the relevant literature, as some documents:

- 1) might be in a language which is not being indexed by any of the database search engines, or
- 2) might be published as a piece of information on a website only, or
- 3) might not have been published (broadly) yet, or not published at all

Hard-to-find documents

Our request to you is to consider the above three scenarios on hard-to-find relevant documents, and to send us back (to:

5.1.5 @euhealthsupport.eu) any document or text that you think qualifies under one (or more) of the three scenarios.

With that we also ask you to clearly state the source where the text originates from (url; applies to texts only). And to provide us with a translation into English of the document title and abstract/summary if the document is in another language than English (automated translation is sufficient: <https://translate.google.com/>)

What information?

We are looking for documents and texts that refer to either infectious disease surveillance, syndromic surveillance, sentinel surveillance or pathogen surveillance in combination with any of the key words integrated, digital/digitalized (digitized), electronic, automated and in combination with any of the key words epidemic, pandemic, epidemic-prone, pandemic-prone

When?

Preferably we would like to receive back these documents and texts from you April 8th at the latest. Then we can compile all documents received, and start analyzing the contents of all literature, and preliminary report back on this in the next JA Integrated Surveillance preparatory meeting.

Questions?

Should you have questions on any of the above? Please don't hesitate to contact us, using this e-mailaddress:

5.1.5 @euhealthsupport.eu

Thank you so much in advance, and looking forward working with you, on behalf of the EUHealthSupport consortium.

Sincerely,

5.1.2e

5.1.2e
