Onderwerp: Joint Procurement - Update and summary / Communication / Next steps - reply by 11 May

Dear Members of the Health Security Committee,

Please find below a summary of the current situation on joint procurement.

1. Signed framework contracts that allow you to order

We have informed you in separate emails of the signature of additional framework contracts, one for coveralls and an additional one for ventilators.
These resulted from negotiation efforts by the Commission to open additional doors for member states to place orders.

Progressively since the beginning of April, you have been able to order from several framework contracts, as summarized in the table below.
(we are also uploading to Circabc a fact sheet for each lot containing the key elements and the link to the order document; accessible for the Specific Procurement Procedure Steering Committee members).

Procurement	Product	Company	Notes
PPE1 *	Coveralls	Dupont	A minimum of orders has to be plac after signature of the framework cc
	Gloves	Ansell	No additional orders can be placed (updates will follow when possible
PPE2 *	Goggles	GYZ	
	Face shields	GYZ	
	FFP2 **	3M / Medicom / Vara Home	
	FFP3 **	Medicom / Vara Home	
	Surgical masks	GYZ / Medicom	
Ventilators	Non-invasive CE	Vyaire / Mindray / Getinge / ResMed / Philips	
	Invasive CE	Vyaire / Philips / Mindray / GE / Getinge	
	Non-invasive non-CE	Vyaire	
	Invasive non-CE	Vyaire / Philips	

* The company Sinopharm was awarded contracts on the PPE2 and Ventilators procedures. However, it was now

removed from the process due to the company's insistence on signing contracts based on Chinese law (and refusal of the framework contract based on EU law). In case you wish to consider direct negotiations, you can already find the offers and contact details in Circabc
(if you do not have access to these specific folders, please contact 5.1.5 5.1.5 @ec.europa.eu).

** An additional contract may still be signed.

2. Laboratory equipment

The Commission has finished the evaluation and award of the tenders received for 30 lots of the laboratory equipment tender. These lots cover some items from the categories: sample collection – swaps; detection and/or extraction kits; reagents for diagnosis; laboratory machinery; and other equipment.
Contracts have now been sent for the companies to sign. Once this happens, you will be able to place orders.
In the annexed table you can find information on the lots for which companies sent (and did not send) tenders. From the 30 lots awarded, 16 are covered in at least 50% of the demand.

3. Communication to the public ***

To improve the way we share information on the joint procurement processes with the public, we propose to selectively communicate

After any contract is signed for a lot of a tender
- the participating countries
- the total quantity of products the companies offered to supply, including the breakdown per country
- the contract value (ceiling) per country

After all contracts in the cascade are signed for a lot of a tender
- the total quantity of products the companies offered to supply, including the breakdown per country
- the contract value (ceiling) per country

After you place orders
- the date of placing orders, the country, products, quantities and delivery schedules (if the company does not object)

The **JPASC** should please let us know by **11 May** in case you do not agree to any of the above (we will otherwise consider the line validated). You can do so at https://circabc.europa.eu/ui/group/eebdec68-587e-4bd3-b228-0f151e80ab63/library/cd13d5dc-a325-4809-a0fa-7919efcfb1a8?p=1&n=10&sort=modified_DESC.

4. Next steps

(In addition to the ongoing work on selected ICU medicines; also the HSC has been asked about the interest in seasonal flu vaccines)
We would like the member states to let us know whether you have interest in pursuing discussions on possible joint procurement of

a) COVID19 tests
(we have information on 78 CE-marked RNA tests; 13 CE-marked antigen tests; 101 CE-marked antibody tests https://ec.europa.eu/docsroom/documents/40805)
b) Patient monitoring equipment; anaesthetics equipment; ultrasound, mobile x-rays, CT scans
(mentioned by industry and some health authorities)
c) PPE and laboratory equipment
(relaunching in areas less well covered)

The **JPASC** should please let us know of your interest to discuss any of the above by **11 May**. Please do so at https://circabc.europa.eu/ui/group/eebdec68-587e-4bd3-b228-0f151e80ab63/library/a669e6e2-9dea-4ffe-a5c0-f92d6aa5e8dd.

Best regards,

*** In parallel, as per Article 27 of the JPA, the Contracting Parties should inform the JPASC of conclusion of specific contracts, and the Commission of the quantity and quality of the deliveries.
You can do so by filling-in a template available at https://circabc.europa.eu/ui/group/eebdec68-587e-4bd3-b228-0f151e80ab63/library/aaf0a0a3-f673-433c-bc41-37011f0101db/details (as well as on respective Circa groups of each specific procurement procedure) and by sending it to [redacted]@ec.europa.eu. The Commission will then share the compiled information with the JPASC on Circa.
The publication of certain information in a contract award notice is also required.
