Dear 5.1.2e and 5.1.2e

Thanks again for the meeting today. Hereby a short summary/action points of what we discussed.

Projectpage

Thank you for the updated version of the text for the project page. Attached you find a clean version in which we have made a few minor changes and additions.

- Please let us know if you approve of this version.
- Also, if you could send us the figure that depicts the matrix structure of the network and a PDF with the updated list of participants in the network, that would be appreciated.

After your approval we can put the project page live on our website together with the interview article with 5.1.2e

Monitoring

- Please let us know your availability for a meeting with 5.1.2e (5.1.2e might substitute 5.1.2e) through the [datumprikker](#).
- 5.1.2e and I will join the WP1 meeting on the 3rd of May. We will join every 2/3 months. In this way, we can be in touch informally on a regular basis, get updated on what is happening in the network and be aware of issues that might need assistance of ZonMw. We hope it will also make us more accessible for questions to members of the network.
- I will look into arranging access for 5.1.2e into the MijnZonMw portal.

Preliminary dates/deadlines for the go/no go moment (additional comments in the decision letter):

- First half of May: we will send you the preliminary reporting format and preliminary assessment criteria.
- Early September: we will send you the final reporting format and assessment criteria.
- Early October: deadline to hand in your report on the progress regarding the additional comments in the decision letter.
- Mid-October: Committee meeting to discuss your reported progress, followed by a written formal decision about continuation of the project.

I will start planning the date for the committee meeting after my holiday next week. When the meeting date is planned, I can finalize the other dates/deadlines.

Patient questions on inclusion

We will refer patients with questions on study inclusions to 5.1.2e @lumc.nl so you can keep a list of interested people.

Minor points

- ZonMw will send the application of the PCNN to grant applicants that get a positive advice in the biomedical and clinical research calls. In this way, we can guarantee that all applicants have access to the same information on the network (principle of equality). It is the responsibility of applicants to find a way to link to/join the network and describe how they will do so in their application.
- 5.1.2e will send us the Excel-format of the budget in your application.
- The NELC meeting where 5.1.2e will present the network is scheduled for the 30th of April. Time is to be announced.

I will be on holiday from April 1st until April 8th and hope to see you in-person in Zwolle on April 9th!

Kind regards,

5.1.2e
post-COVID
