Hello [REDACTED] 5.1.2e

I was sent CSV files by all of them, [REDACTED] 5.1.2e They told me they were from the Test centres of all the tests that had been performed, including mobile test centres.

Some of the lists had over 100,000 names and tests on them with 7 or 8 tests of each person over the span of a month.

I uploaded all the lists they sent me into the database, and then I ran them all through the multilevel verification platform I created to protect the data and the public of The Netherlands. Also to protect the government too from not paying more than what it was supposed to.

I found that so many of the BSN numbers were not correct, others has the same BSN number for multiple people. Some BSN numbers did not even match the 11 verification they supposed to.

We eliminated all the duplicates, and all the fake names on the system.

When I told them that there were a lot of fake names that were erased from the system, they went very quiet. I dont think they liked it, but they did not want to tell me.

They told me not to talk to anyone else about this all, and dont give the raw data to anyone. They said they dont want other people to add names to the system, but from you have told me they added names themselves.

The CSV files we received we deleted from the system to ensure the privacy of the people was held up under Netherlands law. But I would say they would not have erased anything.

I hope this helps

Regards

[REDACTED] 5.1.2e

Hi 5.1.2e

Please could you sent me today??? an explanation how 5.1.2e sent you the lists and what they told you.

Then who did it. 5.1.2e

I know you did this allready but I need it again.

We are very closed now but 5.1.2e and 5.1.2e try to say things they are not true.

I am at the ministerie friday 13.30 hours.

Thank you friend,
