Subject: Moderna Milestone: COVID-19 variant data, including Delta
Received: Tue 6/29/2021 9:14:26 PM

Dear Minister de Jonge, dear all

I hope this finds you well.

First, we would like reiterate our thanks for your time to meet with us on 7 June. We appreciated the exchange and remain available for any questions you might have.

Additionally, we also wanted to take this opportunity to share the latest update relating to new SARS-CoV-2 variants, including the Delta variant.

Moderna is delighted to share with you that [new study results](#) indicate that our COVID-19 Vaccine Moderna remains protective against recently detected variants, in addition to variants previously tested. In detail, the findings show that our vaccine produced neutralizing titers against all emerging variants tested, which include:

- Alpha variant B.1.1.7 (first identified in the UK)
- Beta variant B.1.351 (first identified in South Africa)
- Delta variants B.1.617 (first identified in India)
- Eta variant B.1.525 (first identified in Nigeria)
- New strains A.23.1 (first identified in Uganda) and A.VOI.V2 (first identified in Angola)

As COVID-19 continues to evolve, Moderna remains committed to studying emerging threats and play our role in combatting the pandemic.

Please do not hesitate to reach out should you have any questions.

Best Wishes,

[5.1.2e]
