Dag [REDACTED] 5.1.2e

We hebben eindelijk CHMP goedkeuring voor het Janssen Vx om als booster in te zetten. Het staat nu al op de website van EMA:
<https://www.ema.europa.eu/en/news/covid-19-vaccine-janssen-ema-recommendation-boosters-dose>

Approved posology:

"Booster dose

A booster dose (second dose) of 0.5 mL of COVID-19 Vaccine [REDACTED] 5.1.2e be administered intramuscularly at least 2 months after the primary vaccination in individuals 18 years of age and older (see also sections 4.4, 4.8 and 5.1).

A booster dose of the COVID-19 Vaccine Janssen (0.5 mL) may be administered as a heterologous booster dose following completion of primary vaccination with an approved mRNA COVID-19 vaccine. The dosing interval for the heterologous booster dose is the same as that authorised for a booster dose of the vaccine used for primary vaccination (see also sections 4.4, 4.8 and 5.1)."

Bij deze ook de SAGE recommendations van 9 dec over het Janssen Vx:

[REDACTED] 5.1.2h

[REDACTED] 5.1.2h

Kort vraagje: hebben jullie al data ergens gepubliceerd over doorbraakinfecties (kan helaas niks vinden op RIVM website).

Alvast bedankt,

[REDACTED] 5.1.2e
