Subject: Re: VITAL WP3 Country Score Tool Stakeholder Consultation

Dear all,

Thank you very much for choosing suitable dates and times for the VITAL stakeholder consultation meeting. The invite will be sent to you soon. In addition, we would like to remind you about our request for your help in the development of the country score tool.

We appreciate enthusiastic responses from some of you indicating your willingness to provide feedback and suggestions. Given your busy schedule and the importance of your contribution, we would like to extend the time for providing feedback until **17 January 2022**. If you have any questions, please do not hesitate to discuss with us by replying to this email.

We are looking forward to hearing from you. Thank you very much for your time!

Finally, we wish you a Merry Christmas and a Happy New Year!

With kind regards,

5.1.2e WP3

Dear all,

For one of the tasks within the VITAL WP3 we would like to ask your help and organize an internal stakeholder consultation meeting in January 2022 (see summary below and the invite will be sent later).

The task is focused on the development of a country score tool in which we would like to consult you as experts from Public Health, Epidemiology, Vaccine companies, Immunization service provider, Healthcare professionals, and Health economics. To prepare for the meeting and make the most out of your contributions, we would like to get your feedback on the current version of the tool before 24th December 2021. Please find the introduction, the current version, and the answer sheet all included in the attached file.

Your feedback on the tool and your presence at this meeting would be highly appreciated! Could you please confirm your possible contribution by replying to this email? If for some reason it is not possible for you to send your feedback before the mentioned time, would it be possible to appoint a substitute member from your WP?

Lastly, we kindly ask you to choose dates and times that suit you for the meeting in January. Please indicate all possible options that fit in your busy schedule via this link:

We are looking forward to hearing from you. Thank you very much for your time!

With kind regards,

5.1.2e

WP3

Summary:

To reach synergy between immunization programs and the context specific implementation, the intention is to develop a country score tool that can help country specific decision makers to assess how ready the country is with regards decision-making and implementation of immunization programs in older adults. We have conducted a scoping review to explore the country assessment framework for an immunization program for the elderly. Retrieved articles have shown diversity in terms of assessment among countries. Given the significant differences in vaccination programs for adults in Europe which they have their own strategies and achieved result at different levels, we propose to use a conceptual framework to provide a complete set of crucial domains and sub-domains for vaccine introductions in elderly elaborated with the guiding questions, explanation, and rationale for each.
